Computer Project Update

Please submit a one page, single spaced Word document to Megan and Dr. Maciejewski via email by 5pm Tuesday, April 12th. The progress update provides us information about where you are in your computer project so we can provide appropriate feedback. Your project update should address the following questions honestly:

1) Where are you currently in your project?
2) What have you changed from your original project proposal?
   a. Briefly summarize your project goals from the initial proposal.
3) What are your next steps?
4) What is the biggest challenge you have encountered thus far in the project?

Note: You will be asked to make an appointment with Dr. Maciejewski and Megan during finals week to demonstrate your computer program. We will expect your program to run on a computer in the engineering network (any computer in the ENGR computer labs) so make sure the code you are writing is compatible now rather than waiting until the final week of class!
