

Industrial Energy Efficiency Workshop

Attend a **FREE** workshop put on by the city of Boulder and the Colorado State University's Industrial Assessment Center to discover ways in which your organization can reduce energy usage. This program is valuable to all manufacturing segments and will provide detailed information on a variety of topics relevant to the industrial sector. The workshop is open to Facility Managers, Energy Managers, and others who may be interested in energy efficiency for industrial and large commercial facilities along the Front Range.

The Details:

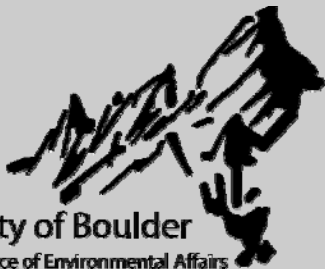

Tuesday, December 11th 2007
8 a.m. – 12 noon

REI Boulder – Conference Room
1789 28th Street
Boulder, CO 80301
