

Chapter 1: College of Engineering Values, Mission, and Vision

The College of Engineering's values, mission and vision were drafted and adopted during Fall Semester, 2005 and support the University's overarching mission and vision. Our College is committed to fostering an environment that supports our students, faculty, and staff as we work toward goals and objectives within this strategic plan.

College of Engineering Values

- ✘ Excellence
- ✘ Ethics & Integrity
- ✘ Creativity & Discovery
- ✘ Diversity
- ✘ Entrepreneurship & Innovation
- ✘ Participation, Collaboration, Partnership
- ✘ Collegiality

College of Engineering Mission

The College of Engineering's mission is to *engineer global solutions* that contribute to the quality of life by:

- ✘ Educating for tomorrow's needs,
- ✘ Advancing society,
- ✘ Generating and applying new knowledge, and
- ✘ Stimulating economic development.

College of Engineering Vision

The College of Engineering at Colorado State University will be nationally and internationally recognized for excellence and innovation in education, research, professional service, and outreach. We will serve society by solving problems of global importance and through contributions to national and international economic development. The College will support a diverse community of faculty, staff, and students in a dynamic environment that fosters the development of each individual and success of the College as a whole.
