

# MECH Day Q&A

**Q: What is MECH Day?**

A: MECH Day is an event designed specifically for students who are considering a major in Mechanical Engineering (MECH) at CSU.

**Q: What will I learn at MECH Day?**

A: This event will provide you with an opportunity to see all the areas in which MECH students experience their major.

**Q: What types of activities can I expect to take part in at MECH Day?**

A: You will interact with current MECH students, explore the hands-on labs, view projects that current students are creating, and learn about Mechanical Engineering concepts directly from MECH faculty.

**Q: Is this event related to Engineering Exploration Days?**

A: This event is an opportunity to add onto the Engineering Exploration Days program which will take place on the following Saturday.

**Q: Will the event provide information about student life outside of CSU?**

A: MECH Day will only dive into the MECH program at CSU, however, you and your guests are encouraged to stay overnight in Fort Collins from Friday to Saturday in order to experience the surrounding community.

**Upon completion of the program you will have had an immersive experience which will allow you to determine whether the Mechanical Engineering major or another Engineering major, Colorado State University, and the Fort Collins community is a good fit for you as you pursue your goals.**
