

Brooks Receives Joan C. King Endowed Memorial Scholarship

On July 20, 2016, **Jennifer Brooks** was awarded the Joan C. King Endowed Memorial Scholarship at the Women of Vision Gala hosted by the Colorado Women of Influence. **Emily Li**, a biomedical engineering student, placed second and received partial scholarship funding.

The Joan C. King Memorial Scholarship supports students with an interest in biomedical sciences or engineering and with an eye toward sharing their talents with the world in the context of work/life balance.

Hannah Robinson Receives SBME Scholarship for Leadership and Innovation

Hannah Robinson received the \$1,000 SBME Scholarship for Leadership and Innovation for the 2016/17 school year for her leadership in designing a new lab for students taking machine dynamics. Robinson's lab allows students to design a four-bar mechanism representing components of the human knee and testing their design on 3D printed bones.

This scholarship supports graduate and undergraduate students pursuing careers in biomedical engineering who show a commitment to leadership and excel as creative problem-solvers.
