

# Geotechnical Engineering Program Colorado State University

## Graduate Research Assistantship

- A research assistantship (Fall 2011-Spring 2013) is available for a new graduate student interested in pursuing an MS degree in Geotechnical Engineering
- Position involves advancing ongoing theoretical and experimental analyses on the strength degradation of tailings and mine waste materials at CSU
- Qualified applicants with strong interests in Geomechanics and Tailings and Mine Waste are encouraged to apply
- Application details are available at:  
<http://www.engr.colostate.edu/ce/applicationinfo.cfm?Source=Future>
- For additional information, please contact:
