CIVE 519 - Course Syllabus

Course number and title: CIVE 519 - Irrigation Water Management
Credits: 3

Course Description:
This course prepares the student to apply basic soil, plant, water, and atmospheric engineering principles for the purpose of determining the crop water need (use), or evapotranspiration (ET), both in time and amounts, to sustain agricultural production while protecting the environment. The course covers a range of methods and instrumentation available to determine ET (crop water requirements), irrigation scheduling, and effective water use, including remote sensing of ET.

Prerequisite: CIVE 425 – Soil and Water Engineering, a hydrology class, or other related classes may be considered.

Instructors: José L. Chávez, Ph.D.
Phone: 970-491-6095
Email: jose.chavez@colostate.edu

Text(s):
2. Class Handouts and directed readings (RamCT Blackboard or CANVAS).

Course objectives and outcomes: The student successfully completing this course will be able to:

1. Determine the required data, apply adequate methods and find efficient solutions in regards to soil water and land surface energy balances, crop water (ET) needs/use, and irrigation systems efficiency evaluation.
2. Select particular methods and instrumentation to properly design an irrigation scheduling mechanism based on specific field, crop, and environmental conditions.

Course Topics (Approximate number of lectures per topic):

1. Irrigation relevance for agricultural production (1)
2. Irrigation management concepts and system elements (1)
3. Irrigation planning and data needs (1)
4. Irrigation hydrologic balance (0.5)
5. Basic soil water physics (0.5)
6. Measuring soil water content (4)
7. Principles of crop water use or evapotranspiration (ET) (2)
8. ET measurements (instrumentation), direct & indirect methods (5)
9. Crop evapotranspiration estimation (models) (2)
10. Irrigation scheduling (2)
11. Spatially distributed crop evapotranspiration estimation (remote sensing-based algorithms) (6)
12. Irrigation efficiency (2)
13. Material review and exams (4)

**Instructional Methodology:** The class will meet two days a week (Tuesdays and Thursdays) for lectures and discussion. Classes will be recorded and will be available through RamCT Blackboard or CANVAS if offered through CSU Online Plus as well.

**Mode of Delivery:** Classroom instruction and RamCT Blackboard/CANVAS.

**Methods of Evaluation:** Students will be evaluated on the basis of examinations and homework. There will be two mid-term exams and a final exam. The course grade will be determined based upon the following percentages:

- **Midterm Exams (2)** = 35% (17.5% each)
- **Final Exam** = 25%
- **Homework** = 40%

Total = 100%

Term grades for this course will use the +/- grading system as described in the CSU catalog. The following scale will be used: A+ ≥ 97; A ≥ 93; A- ≥ 90; B+ ≥ 87; B ≥ 83; B- ≥ 80; C+ ≥ 77; C ≥ 70; D ≥ 60; F < 60.

**Policies:** I will accept late homework submissions up to five days after the due date or before solutions are distributed, whichever comes first. A penalty of 20% per day late will be assessed on these assignments. Make-up exams will be given only for university-approved excuses or when you have a note from a medical professional. Students are encouraged to discuss and collaborate, however, the final work you submit should be distinctly your own. CSU policies on academic integrity will be rigorously enforced in this course.
