MATLAB®-BASED ELECTROMAGNETICS presents and explains electromagnetics “hands on” using MATLAB on one side and develops and discusses MATLAB for electromagnetics on the other.

FEATURES:
• 389 MATLAB computer exercises and projects of all levels of difficulty, combined with fundamental theory
• MATLAB coverage of all topics and concepts in undergraduate EM fields and waves
• 125 TUTORIALS with detailed worked out solutions merged with listings of MATLAB codes (m files)
• 98 HINTS providing guidance on the solution; 130 MATLAB exercises recommended to be done also “by hand”
• 48 movies developed and played in MATLAB, 133 MATLAB-generated figures (color versions available on Companion Website), and 16 GUIs built in MATLAB
• Abundant opportunities for in-class and homework projects, lectures, recitations, and class demonstrations

Branislav M. Notaroș is Professor of Electrical and Computer Engineering at Colorado State University, where he conducts research in computational and applied electromagnetics. He is the author of a textbook Electromagnetics (Pearson Prentice Hall, 2010) for undergraduates and has published three workbooks and more than 100 journal and conference papers. Prof. Notaroș was the recipient of the 2005 IEEE MTT-S Microwave Prize, 1999 IEE Marconi Premium, 2005 UMass Dartmouth Scholar of the Year Award, 2009, 2010, and 2011 CSU ECE Excellence in Teaching Awards, 2010 CSU College of Engineering George T. Abell Outstanding Teaching and Service Faculty Award, and 2012 CSU System Board of Governors Excellence in Undergraduate Teaching Award.
