

Job Opportunities for Sediment Transport Engineer

Wood Rodgers, Inc. is looking for an entry- or mid-level Hydraulics and Sediment Transport Engineer for our office in Sacramento, CA. A Master's Degree in water resources is desired. Duties include conducting sediment yield analyses, sediment transport modeling, riprap design, sediment management studies, and associated hydraulic analyses.

We currently utilize sophisticated hydraulic modeling software such as HEC-RAS, MIKE 11, MIKE-FLOOD, MIKE 21, RMA-2.0, FLO-2D. We provide innovative hydraulic design services related to levees, floodwalls, and levee protection works. Various clients include the U.S. Army Corp of Engineers; California Department of Water Resources; Alameda, Yolo, Sacramento, and Ventura Counties, as well as other state and local agencies.

We have approximately 30 water resources professionals in our offices in Sacramento and Oakland, CA, and Reno, NV. The candidate will be expected to work with projects managed by all three offices.

Benefits for full-time employees include PTO; holidays; medical/dental/vision/life/disability insurances; 401(k) Savings Plan; Profit Sharing; and a discretionary bonus plan. Wood Rodgers also has incentives for published papers/articles, and presentations at conferences.

The salary will be commensurate with experience.

If you are interested in scheduling an interview regarding this position, please telephone Shyamal Chowdhury at 916-326-5816, or email him at schowdhury@woodrogers.com.
