Reclamation District No. 108, located approximately 45 miles NW of Sacramento, CA, is seeking an exceptional candidate for the newly created position of Assistant Manager. The District provides irrigation water, drainage and flood protection to 48,000 acres of diversified farmland through an extensive system of irrigation canals, drains and pumping plants. This is a great opportunity to join a progressive water District in the heart of Sacramento Valley. The District is looking for self motivated individual that is an innovative program manager/problem solver with good technical and communication skills. This successful candidate will lead projects as well as supporting the General Manager. Current activities include construction of large scale solar project, extensive SCADA system, District GIS mapping, extensive water conservation activities, several infrastructure improvement projects, engaging statewide flood planning processes and California water supply issues. The candidate should have excellent computer skills. Salary will be approx. \$70,000/yr DOQ, includes District-paid comprehensive benefit package including a 2,000 sq. ft. District residence in addition to the salary. Minimum of 5-years of water resource and/or flood control management experience in addition to a BA/BS in related field. Application package available by email (rd108@rd108.org) and must be received no later than September 25, 2009.
