

MECHANICAL ENGINEERING

SUMMER RESEARCH AND GRADUATE SCHOOL PREPARATION PROGRAM

Application Requirements:

- GPA 3.25 or above
- Resume and personal statement
- Top three choice of available projects (see program website)

"The program was great for character development. I learned a lot of technical things, but I also learned about perseverance and determination, which will be helpful for life in general."

-Yuchen Huang, summer 2022 participant

About the Program

The Summer Research and Graduate School Preparation Program is a paid, 10week internship that offers undergraduate students research experience while preparing them for graduate school. Depending on their research interests, students will have the opportunity to work alongside mechanical engineering faculty on research spanning health, biomedical, energy, materials and manufacturing, and aerospace all while developing skills necessary for success in graduate school. By the end of the program, participants will understand how to conduct research, write for academics, and present research findings. Participation in the program will cover the cost of room and board, allowance for transportation, and a monthly stipend.

Application Process & Virtual Interview Session

Students interested in participating should <u>visit the website</u>, explore the available projects for the 2023 program, and fill out the online application.

Applications will be accepted until 11:59 p.m. on Monday, January 30th, 2023. After the applications close, program coordinators will invite a select number of students to participate in a virtual interview session on February 7th, 2023, 9:00 a.m. - 12:00 p.m. MDT. During this session, students will be introduced to Mechanical Engineering research areas, faculty, and facilities.
