

A photograph of a wind turbine in a field of green crops at sunset. The wind turbine is on the left side of the image, and the sun is setting on the right side, creating a warm orange glow. The foreground is filled with green leaves, likely soybeans.

Spring 2019 Engineering Career Fair

**Thursday
February 21
10 am - 4 pm
Hilton**

WALTER SCOTT, JR.
COLLEGE OF ENGINEERING
COLORADO STATE UNIVERSITY

Aerstone

6010 Executive Blvd., Suite 1020
Rockville, MD 20852
www.aerstone.com

AERSTONE

Aerstone is a service-disabled veteran-owned small business (SDVOSB) that provides subject matter expertise and software development services in the field of advanced cybersecurity. Our commercial customers include medium and large organizations in the financial services, legal, utility, and education spaces – as well as a number of non-profit organizations. The company also provides exceptional support and cleared staff to a wide variety of federal organizations in the civilian, military, and intelligence community sectors. Our products and services touch all aspects of cybersecurity, including architecture, systems design, software development, training, assessment, penetration testing, and forensics. Aerstone's dynamic, high-energy work environment is fueled by exceptional people driven by a desire to deliver quality results. We believe in working with people who are fun, smart, creative, and caring. We also love a challenge, and believe in pushing ourselves to solve hard problems, and to exceed client expectations. We thrive on repeat business from long-term clients who are thrilled with our work! Aerstone provides excellent health benefits and education, certification, & training opportunities for its employees.

HDR Engineering

1670 Broadway, Suite 3400
Denver, CO 80202
www.hdrinc.com

With nearly 10,000 employees in 225 locations, HDR specializes in engineering, architecture, environmental and construction services. While we are most well-known for adding beauty and structure to communities through high-performance buildings and smart infrastructure, we provide much more than that. We create an unshakable foundation for progress because our multidisciplinary teams also include scientists, economists, builders, analysts and artists. That's why we believe diversity is our greatest strength. HDR is proud to be an equal opportunity workplace and an affirmative action employer. We believe that the way we work can add meaning and value to the world. That ideas inspire positive change. That coloring outside the lines can illuminate fresh perspectives. And that small details yield important realizations. Above all, we believe that collaboration is the best way forward. At HDR, we know work isn't only about who you work for; it's also about what you do and how you do it. Led by the strength of our values and a culture shaped by employee ownership, we network with each other, build on each other's contributions, and collaborate together to make great things possible. When you join HDR, we give you license to do the same. We help you take charge of your career, giving you multiple growth opportunities along the way.

Honda R&D Americas, Inc.

21001 State Route 739
Raymond, Ohio 43067
www.hondaresearch.com

Honda R&D Americas, Inc. (HRA) was founded in Central Ohio in 1984, and is responsible for creating advanced products and technologies that provide new value to Honda and Acura customers. In our world-class facilities, we have the capability of complete product creation – from initial vehicle sketches, all the way through mass production. Some of the more recent vehicles we have developed are the 2019 models of the Acura RDX, MDX, TLX, and the Honda Odyssey, Passport, Pilot, and Ridgeline. HRA in Ohio is the 2nd largest R&D facility for Honda in the world, which includes the power-train division. The Power-train division is looking for passionate, self-driven, forward-looking engineers to help propel us towards our 2030 Vision; to “Lead the advancement of mobility and enable people everywhere in the world to improve their daily lives”.

At Jacobs, our focus on building long-term client relationships has helped us become one of the largest and most diverse providers of technical, professional and construction services, including all aspects of architecture, engineering and construction, operations and maintenance, as well as scientific and specialty consulting. Our 77,000+ employees in 400+ locations around the world serve a broad range of companies and organizations, including industrial, commercial, and government clients across multiple markets and geographies. More than 95 percent of our work is repeat business. We get to know our customers' businesses intimately, and partner with them to help them achieve their objectives. That commitment to our clients produces consistent cost advantages, profits and growth, allowing us to attract and retain the industry's top talent. Our strict dedication to safety and uncompromising ethics create a work environment that promotes employee progress and helps generate nearly \$11 billion in annual revenue. We measure the value we bring to clients every day — wherever in the world they may be, in any industry or technical discipline. In fact in 2017 we produced \$2.27 billion in client savings through our JacobsValue program, a major accomplishment.

TriLynx Systems

320 East Vine Drive, Suite 212

Fort Collins, CO 80524

www.trilynx.systems

TriLynx Systems provides software for real-time environmental data collection and management with focus on flood warning systems and emergency management. TriLynx Systems products and services provide an important benefit to our clients and society. TriLynx clients include government and private entities in the US and other countries that are interested in monitoring environment conditions such as rainfall, water level and flow, water quality, wind, temperature, and other parameters. Data reports are collected using various technologies and are managed in on-site and cloud systems. The data are then used to make decisions and communicate information. TriLynx provides a software solution based on Linux and open source technologies. We provide services to implement and integrate our solution with our clients' information technology environments. TriLynx is evaluating talent to augment our small team. Of particular interest is an ability to troubleshoot and provide support for complex technical environments, using and contributing to the support knowledgebase, and collaboratively working with clients and TriLynx staff. Technical skills that are needed include Linux administration, command line use and scripting, database design and administration (PostgreSQL, SQLite, and others), and network tools. Proficiency with one or more programming language is desirable to contribute to product enhancement and new products, using C, Java, and Python. Familiarity with software development tools such as Git and automated testing frameworks is required. TriLynx is also evaluating additional staff for web application projects including JavaScript, Angular, and web services.
